

DOHRNII

Whitepaper Zero

DHN v2 Tokenomics

SEPTEMBER 2026

A clearer supply for DHN v2.

Dohrnii makes crypto and finance easier to understand through short, interactive learning. DHN supports this ecosystem. As DHN moves to v2, its supply is being simplified to reflect the project's long-term needs.

99.8%**of the circulating supply has migrated to DHN v2**

Existing holder balances remain unchanged.

72M

NEW MAX SUPPLY

17.08M

IN CIRCULATION

23.72%

CIRCULATING SHARE

300M DHN**permanently burned from former locked reserves**

80.65% of original supply / 94.87% of former locked supply

SUPPLY AFTER THE BURN

Current circulating supply	17,075,042	23.7153%
Allocated, not currently circulating	38,717,518	53.7743%
Reduced long-term reserves	16,207,440	22.5103%

Smaller reserves, clearer purpose.

The former locked allocations are reduced proportionally. Together, the remaining long-term reserves total 16,207,440 DHN.

ALLOCATION	DHN	OF 72M
Dohrnii Academy learning incentives	9,724,235	13.5059%
Staking and yield pools	1,906,713	2.6482%
Ecosystem growth and development	1,906,713	2.6482%
Liquidity reserve	953,738	1.3246%
Community and governance	953,356	1.3241%
Team	762,685	1.0593%

Our principle

DHN should be supported by the supply the ecosystem genuinely needs. The burn will be completed before DHN v2 becomes tradable and will be verifiable on-chain.

Figures are rounded to whole DHN. Percentages refer to the new 72,000,000 maximum supply.

Important information

Please read this disclaimer carefully before using this whitepaper, acquiring DHN or interacting with the Dohrnii ecosystem.

PURPOSE OF THIS DOCUMENT

This whitepaper is provided for general information only. It describes the current vision, intended functionality and tokenomics of Dohrnii and DHN. It is not a prospectus, offering memorandum, financial promotion, invitation, recommendation or solicitation to buy, sell or hold DHN or any other asset. Nothing in this document creates a contract, binding commitment or fiduciary relationship.

UTILITY TOKEN - NOT A SECURITY

DHN is intended as a utility token for use within the Dohrnii ecosystem. It is not designed, marketed or offered as a share, debt instrument, fund interest, deposit, derivative, collective investment scheme or other security or regulated investment product. Holding DHN does not, by itself, provide ownership in Dohrnii Labs or any affiliated entity, nor any right to dividends, revenue, profits, repayment, interest or guaranteed yield. Legal classification may differ between jurisdictions and may change over time. No representation is made that DHN is unregulated or exempt from regulation in every jurisdiction.

NO FINANCIAL OR PROFESSIONAL ADVICE

Nothing in this whitepaper is financial, investment, legal, tax, accounting or other professional advice. Dohrnii does not assess whether DHN is suitable for any person. Prospective users and holders should conduct independent research and obtain advice from appropriately qualified advisers familiar with their circumstances and jurisdiction.

CRYPTOCURRENCY RISKS

Digital assets are highly speculative and may be subject to extreme price volatility, limited liquidity, market manipulation, custody failures, fraud, cyberattacks, protocol failures and loss of market access. The value of DHN may rise or fall significantly and may become zero. Past performance, market prices, token burns, supply reductions, exchange listings or ecosystem growth do not guarantee future value, liquidity, demand or adoption. Never acquire digital assets with funds you cannot afford to lose.

TECHNOLOGY AND CUSTODY RISKS

Blockchain transactions are generally irreversible. Users are responsible for wallet security, private keys, transaction details, compatible networks and destination addresses. Lost keys, incorrect transfers, compromised devices or interaction with malicious contracts may result in permanent loss. Smart contracts, upgrade mechanisms, bridges, wallets and other software may contain vulnerabilities or behave unexpectedly despite testing or audits. An audit reduces risk but cannot eliminate it.

MIGRATION AND TOKEN INFORMATION

Migration figures, circulating supply, allocations and burn information reflect data available when this whitepaper was issued and may be updated following reconciliation, on-chain events, exchange reporting or technical implementation. The burn applies to DHN controlled by Dohrnii Labs under the former locked schedule and does not reduce independently held balances. Users must follow only official migration instructions and verify contract addresses through official Dohrnii channels.

REGULATION AND ELIGIBILITY

Laws governing digital assets differ materially and continue to evolve. Access to DHN, migration, exchanges, rewards or ecosystem features may be restricted, suspended or unavailable in certain jurisdictions or for certain persons. Users are responsible for complying with applicable laws, sanctions, anti-money-laundering requirements, tax rules and local restrictions. Dohrnii may apply eligibility checks or compliance controls where required.

FORWARD-LOOKING STATEMENTS

Statements concerning future functionality, development, adoption, listings, incentives, governance, timelines or ecosystem growth are forward-looking and involve assumptions and uncertainties. Actual results may differ materially. Plans may be changed, delayed or discontinued for technical, commercial, legal, security or regulatory reasons. Dohrnii undertakes no obligation to achieve any roadmap item or update forward-looking statements except where required by law.

THIRD PARTIES, TAXES AND AVAILABILITY

References to exchanges, wallets, service providers, websites or other third parties do not constitute an endorsement or guarantee. Third-party services are independently operated and may fail, restrict access or impose additional terms. Users are solely responsible for determining and paying any taxes arising from acquiring, holding, migrating, using or disposing of DHN. Continuous availability of the Dohrnii platform, DHN functionality or any third-party market is not guaranteed.

NO WARRANTIES AND LIMITATION

To the maximum extent permitted by applicable law, this whitepaper and the Dohrnii ecosystem are provided on an 'as is' and 'as available' basis without express or implied warranties, including accuracy, completeness, merchantability, fitness for a particular purpose, non-infringement, availability or future performance. Dohrnii Labs and its affiliates, directors, officers, employees, contractors and contributors shall not be liable for losses arising from reliance on this document, use of DHN, market movements, technical failures, regulatory action or third-party conduct, except where liability cannot legally be excluded.

UPDATES AND INDEPENDENT REVIEW

This whitepaper may be amended or replaced without prior notice. The latest official version and on-chain records should be consulted where information differs. By relying on this document or interacting with DHN, each person acknowledges that they understand the risks, are acting on their own judgment and remain responsible for obtaining independent legal and financial advice. This disclaimer should be reviewed with qualified counsel before publication in any specific jurisdiction.
